Batch No

Date of Manufacture

QUALIBRA is a soil water conservation agent that promotes the management of water in turfgrass root zones.

It is designed for use on all areas of golf courses, sports fields and other amenity turf areas.

RESTRICTIONS

Prevent spray drift onto surrounding areas.

SAFETY PRECAUTIONS

- **IRRITANT**
- Irritating to eyes.
- In case of contact with eyes, rinse immediately with plenty of water and seek medical advice.
- Wear suitable protective clothing and gloves when handling the concentrate.
- Wear eye/face protection.
- Keep out of reach of children.
- Keep away from food, drink and animal feedingstuffs.
- When using do not eat drink or smoke.
- To avoid risks to man and the environment, comply with the instructions for use.
- KEEP IN ORIGINAL CONTAINER, tightly closed, in a safe place.
- WASH OUT CONTAINER THOROUGHLY, and dispose of safely.
- DO NOT RE-USE CONTAINER for any other purpose.

Directions for use:

QUALIBRA is well tolerated by all major turf species and allows more uniform distribution of moisture throughout the root zone. Following application water conservation effects occur throughout the root zone and not just on the surface or thatch layers. For optimum turf quality **QUALIBRA** should be used in conjunction with turf management practices that promote good turf health.

Timing

Apply **QUALIBRA** at monthly intervals in a preventative programme to prevent the development of localised dry spot and aid water management.

Irrigation should be done within 24 hours of the application of **QUALIBRA**.

QUALIBRA would typically be applied from early spring to autumn, but can be applied throughout the year if required.

Application rates:

Crop	Dosage	Remarks
All turf	20 l/ha	Apply in water volume of 400 - 1000 l per hectare. Apply at least 5 mm irrigation soon after application of QUALIBRA .

MIXING AND SPRAYING

- Make sure the sprayer is clean and set to give an even application at the correct volume and an even deposit. Half fill the spray tank with clean water and commence agitation. Add the required quantity of **QUALIBRA** to the spray tank. Complete filling to the required volume and continue to agitate throughout the spraying operation.
- Do not leave the spray liquid in the sprayer for long periods (such as overnight). Make up only the amount of spray required for immediate use.
- Thoroughly wash all spray equipment with water immediately after use.
- Continue agitation while in spray tank.
